

Care Home Kitchens from PKL

PKL, which recently launched its permanent modular kitchen pods into the care sector, also specialises in the supply of temporary kitchens and catering equipment for hire.

The company regularly supplies temporary kitchens to nursing homes undergoing planned refurbishments to enable the continuation of meal provision while works are taking place.

PKL has over 900 temporary kitchen units in a range of different sizes, which means the company can provide solutions to nursing homes, whatever their size. A range of ancillary units are also available including cold rooms and dry storage facilities. PKL also holds a stock of over 10,000 items of catering equipment available for hire.

Temporary kitchens can be delivered to site and installed within a few hours of order if required. They are often specified during emergency situations if a kitchen has to close at short notice, due to factors such as fire or flood.
