SensorCare clinically proven to reduce falls

MOBILITY is an important part of everyone's quality of life. However for the vulnerable, vacating a bed or chair unassisted can mean that unnecessary risks and dangers exist.

SensorCare Falls prevention sensors provide an early warning that alerts the carer that mobilisation is being initiated, thus enabling appropriate attention to be given with the aim of preventing a fall and the subsequent injury that may occur.

The systems are generally easy to use and provide the carer temporary respite and the confidence and freedom to carry on with their daily routines.

SensorCare falls prevention system can be used as a stand-alone system; relayed to a pager giving the carer more freedom; or interfaced to an existing nurse call system.

The monitors consist of two components; a pressure sensing panel which is located beneath the mattress or chair cushion and a control unit which is placed in a convenient position for the carer to operate.

LaundryPods from PKL

INTRODUCING LaundryPods, the latest innovation from PKL the UK's leading provider of temporary kitchens and commercial catering equipment.

LaundryPods enable existing laundry areas to be converted into revenue-generating space, such as additional bedrooms, making them ideal for the care sector.

Each LaundryPod is a permanent modular laundry building which can be delivered within six weeks from the date of order. LaundryPods come fully equipped with high-performance, energy-efficient commercial washers and dryers.

Available on a fully inclusive contract hire basis, LaundryPods can offer guaranteed fixed laundry costs, including all maintenance of the building and the equipment.

They are fully compliant with CQC requirements for care and nursing home laundries, and can be relocated, moved or extended as required.

They are available in a wide range of external finishes, including custom colours and brick or wood cladding, so they can compliment surrounding buildings

Urgent medication delivered in three hours

HAVE you ever been in a situation where the doctor has had to come in on a Sunday or a Bank Holiday to attend to a critically ill resident?

The doctor has issued a prescription and the patient needs to start the medication as soon as possible. But your chemist is not open and you may have to wait until the next day or sometimes longer.

We can deliver 365 days a year and on most days we aim to deliver urgent medication such as anti-biotics within three hours.

All of our care and nursing homes have access to on call pharmacist who can help out of hours with emergency dispensing.

Enquiries: Telephone 0845 5577008 or visit www.yakubchemist.co.uk
