

Proven Packages™ PP7

This Proven Package is a comprehensive solution to hospital kitchen refurbishments, emergency hires due to fire and complete event kitchens for large scale functions.

You can have up to 12 staff working in this facility, and the central link area can be adapted for any type of application - hospital trolley storage and distribution, event kitchen central hub, additional dry storage or stand-alone refrigeration space.

PP7 is a great kitchen complex for those longer term hires where you need that extra circulation and storage area, and the catering staff will find the working environment a pleasant one due to the space available.
